5000 Series - No Phone Line

System Concept

The 5000 Series Switching Equipment will allow visitors in the lobby to communicate directly with the tenant via their telephones. The system does not use the telephone company's external lines, therefore there is no monthly line rental fee. The equipment requires no programming (all programming is done at lobby panels). A complete system is achieved by interfacing to any of our *Prestige* or *Economy* Series lobby panels. For ease of operation, the Call Waiting feature uses the telephone hook-switch in a similar fashion to that used by the telephone company. Connection is made using standard CA71A (Canada) or RJ71C (USA) telephone jacks.

Features

- ◆ No Monthly Line Rental Fee
- ◆ Provides Intercom for tenants that do not have outside telephone line service
- ◆ Operates with Tone or Rotary Phones
